---

I am an experienced QA lead engineer who have been conducting web based & mobile (iOS and Android) testing. My experience includes writing test cases/ scenarios, automated tests, and documenting specifications to delivery a high level product.

SKILLS:

- **Languages**:   Ruby, HTML5, CSS, Shell scripting.
- **Tools**:   Git, Jenkins, TestRail, BrowserStack, Favro, Jira, Confluence.
- **Frameworks**: Cucumber, Selenium.

WORK EXPERIENCE:

- *QA lead engineer — Nebenan.de (Germany)*
(Oct 2017 – Now)

Leading a QA team of three including hiring & mentoring. Writing high & low level automated tests on Ruby. Developing test scenarios & specifications, maintaining test (TestRail) & issue (Jira) tracking tools, and assisting product and design teams.

- *QA engineer — Nebenan.de (Germany)*
(Oct 2016 – 2017)

Performing all kind of testing (from A to Z): including manual testing, documenting test scenarios & specifications, ensuring test & bug tracking tools.

- *Navigation software field tester — HERE Berlin (Germany)*
(Jun 2016 – Sep 2016) – Internship

Performing exploratory & smoke tests of "HERE WeGo" application on iOS and Android platforms. Creating flow diagrams. Reporting bugs & writing reports.

- *Navigation software tester — HERE Berlin (Germany)*
(Feb 2014 – Feb 2015)

Writing cucumber scenarios for automated testing. Maintaining automated tests written on Ruby. Conducting "Voice guidance assistant" survey.

EDUCATION:

- *MSc in Geodesy and Geoinformation Science* (Specialization: Geoinformation)
Technische Universität Berlin (Oct 2012 – Apr 2016)

Master Thesis: "Development of an indoor location-based services information system" - A prototype application for Android where a user interacts with surrounding information based on geofencing.

- *Diploma in Construction Geodesy* (Specialization: Land Surveyor/ Geoinformation)
Tallinn University of Applied Sciences (Sep 2006 – June 2010)
